

The Tagore Dental College Centre for Research, Innovation and Entrepreneurship (TDCCRIE)

The Tagore Dental College Centre for Research, Innovation and Entrepreneurship (TDCCRIE) is a Pre-incubation Centre located at Tagore Dental College and Hospital. The Centre has been formed with the mission of promoting and fostering research in the institution. It has been formed after a tripartite agreement has been struck between the Centre, Crescent Incubation and Innovation Council and Simbioen Laboratories. The Centre has obtained a fund of Rs.10,5000/- from a research group in Jarzan University, Saudi Arabia and has completed a project to investigate the role a melatonin as a protective agent in the Periodontitis Alzheimers axis. The project is completed and the report and manuscript is in drafting stage.
