

## **ROTARY ENDODONTICS CERTIFICATE COURSE 2017**

Lecture and hands on and conducted on 14/11/17 and 15/11/17. Patient case followup -3 months

This course started with a opening lecture by the head of the department DR.BALAGOPAL who gave a insight on access opening, working length determination and cleaning and shaping. It was followed by a lecture on rotatory assisted endodontics where “ PROTAPER ” was used and intricate details of it were explained

**Day 1 :** Access opening and basic instrumentation and hands on demo on molars and premolars

Was started with a demo on access opening in extracted molars and premolars followed by students getting trained by their respective mentors

**Day 2 :** The students were trained on the usage of protaper instruments on extracted teeth. The support was given by DENTSPLY with the endomotors and protaper training kits.

This was followed by allotment of clinical cases to the students so that they can start learning rotary assisted endodontic on patients and this is continued for next three months
